This is to certify that the plants, plant product or other regulated articles described herein have been inspected and/or tested according to appropriate official procedures and are considered to be free from the quarantine pests, specified by the importing contracting party and to conform with the current phytosanitary requirements of the importing contracting party including those for regulated non-quarantine pests.

### III. ANNEX

1

#### 1.a

Chili (Capsicum frutescens) The consignment complies with Commission Implementing Regulation (EU) 2022/959 Amending Annex VII, point 62 d of Commission Implementing Regulation (EU) 2019/2072. The fruits of Capsicum frutescens: (i). Have been produced in an approved site of production, which is included in the list of production site codes that has been communicated in advance in writing to the Commission by the National Plant Protection Organization of Uganda, and (ii). Have been subjected to an effective systems approach to ensure freedom from Thaumatomotibia leucotreta (Meyrick), in accordance with the International Standards for Phytosanitary Measures 14 (ISPM 14), the systems approach & documentary evidence of its effectiveness has been communicated in advance in writing to the Commission by the National Plant Protection Organization of Uganda, and (iii). Prior to export, have been subjected to official inspections for the presence of Thaumatomotibia leucotreta (Meyrick), with an intensity to enable at least the detection of 2 % level of infestation, with a level of confidence of 95 % in accordance with the International Standard for Phytosanitary Measures 31 (ISPM 31) and including destructive sampling in case of symptoms, and (iv). Are accompanied by a phytosanitary certificate that indicates the production site codes. (In the treatment box or section please write "system approach") Consignment meets the conditions laid down in Article 10.1c of Commission Implementing Regulation (EU) 2023/1134. The fruits of Capsicum frutescens fulfil the following requirements: Prior to export the fruits of Capsicum frutescens have been subject to an official inspection and found free from the Spodoptera frugiperda (Smith), and originate from a site of production complying with the following conditions: (i). it is registered and supervised by the National Plant Protection Organization of Uganda; (ii). official inspections have been carried out during the last three months prior to export, and no presence of the Spodoptera frugiperda (Smith), has been detected on the fruits of Capsicum frutescens; (iii). it has physical isolation against the introduction of the Spodoptera frugiperda (Smith); (iv). information ensuring traceability of the fruits of Capsicum frutescens to that site of production has been ensured during their movement prior to export. Consignment complies with Annex VII, point 68 c of Commission Implementing Regulation (EU) 2019/2072 and Traceability code mentioned on the certificate, originate in a place of production established by the national plant protection organization of Uganda as being free from of Neoleucinodes elegantalis (Guenée) in accordance with the relevant International Standards for Phytosanitary Measures and official inspections have been carried out in the place of production at appropriate times during the growing season to detect the presence of the pest, including an examination on representative samples of fruit, shown to be free from Neoleucinodes elegantalis (Guenée), and information on traceability is included in the phytosanitary certificate referred to in Article 71 of Regulation (EU) No 2016/2031. Consignment of Capsicum frutescens complies with Annex VII, point 72.1c of Commission Implementing Regulation (EU) 2019/2072 and traceability code mentioned in the phytosanitary certificate: Point 72.1 c; No signs of Bactrocera latifrons have been observed at the place of production and in its immediate vicinity since the beginning of the last complete cycle of vegetation, on official inspections carried out at least monthly during the three months prior to harvesting, and none of the fruits harvested at the place of production has shown, in appropriate official examinations, signs of Bactrocera latifrons
